

# Learning Improvement Plan

**Goal 1:** Improve children's foundational literacy skills.

**Challenge of practice:**

If we design learning to incorporate HITS in relation to phonological awareness (a key skill underpinning the development of reading), then we will improve children's literacy.

**Success criteria**

Phonological awareness skills mapping tool (PASM).

Analysis of our pedagogical documentation will reflect children's voice and show children;

1. Children will demonstrate the ability to hear, make and maintain a steady beat.
2. Demonstrating an increased understanding of; recognising, matching and producing rhyme.
3. Children will increase their knowledge of segmenting syllables and onset and rime, through the participation of word studies of story tables as evidenced in floor book documentation.
4. Growth in the Phonological awareness skills mapping tool (PASM) as a component of the BOOST language program.
